

# PRODUCT UPDATE

The New Fitness Ball Storage Tree System solves the problem of storing Fitness Balls once-and-for-all!

It can store up to 16 Fitness Balls\*, using a special 8-groove profile that allows 4 balls to be stored on each level. Each level can then “interlock” with the level below to fully maximise use of storage space and minimise the overall height.

It is easy to assemble, requiring no tools. It can be easily added to by simply using more Fitness Ball Rings - available separately.

The Fitness Ball Rings can also be wall-mounted.

Code	Description
------	-------------

FT	Fitness Ball Storage Tree- Stand Only. Comes with 2m 8-way vertical, 4 Legs. Holds up to 16 Rings
FTR	Ring to suit Fitness Ball Storage Tree.

\*Max ball size 65cm diameter

#Must be fixed to suitable fixture.

Suitability To be determined by Installer.

Fixing screws not included.

Rings can be added as required, tree can be tailored to suit the amount of balls being stored.

Easy assembly- simply slide plates into special 8 way groove and tighten wing nut.

Uses 4 separate legs. Use 3 legs only to store against wall and two for corner mounting. (This will reduce storage capacity.)
